PROFESSIONAL SUMMARY

Results-driven computer Science graduate with hands-on experience in software development, networking, systems administration, SQL, and Power BI. Experienced in enterprise IT support, software debugging and automation, web technologies, and data analysis. Recently completed practical Business Intelligence training using SQL Server and Power BI, including the development of interactive dashboards and a Sales & Logistics Intelligence project. Passionate about building reliable technology solutions and transforming data into meaningful insights.

PROFESSIONAL EXPERIENCE

ICT Attachee – Kenya Power & Lighting Company

March 2024 – August 2024 | Ruiru Transmission Depot, Kiambu County

- Supported end-user computing by performing hardware diagnostics repairs and preventive maintenance on laptops, desktops and printers.
- Assisted in the administration of Local Area Networks (LAN s), including configuration of Cisco routers and switches, ensuring reliable network.
- Supported telecommunications systems including radio and SCADA configurations.
- Conducted ODF cabinet preventive maintenance.
- Participated in system upgrading, design, and maintenance activities.

- **Key Achievement:** Supported timely resolution of IT issues, reducing operational downtime.

Software Developer – Remote Debugging & Automation (Freelance)

Remote (march 2024- present)

- Worked with clients on remote debugging, bug triaging, and test automation tasks.
- Cloned, modified, and analyzed open-source Java and Python code bases.
- Managed Git workflows including commits, merges, and documentation updates.
- Assisted clients in understanding software performance issues, regressions, and patch management and updates.
- Reviewed and evaluated unit test coverage to improve code reliability.

STUDENT TECH COMMUNITIES

Member, Tech Projects & Community Development – EUCOSSA

2021 – 2025 | Egerton University

- Contributed to student-led software development projects in web and mobile technologies.
- Collaborated on practical solutions using HTML, JavaScript, and APIs.
- Participated in technical discussions, peer learning sessions, and project reviews.
- Mentored fellow students and supported community knowledge sharing.

Core Contributor – Student Developer Projects (GDSC Egerton)

- Contributed to projects aligned with Google Developer best practices.
- Built interactive and scalable features using front-end and application logic.
- Collaborated on debugging, testing, and feature refinement.

Business Intelligence& Data Analytics Training with SQL & Power BI - KeDatalab

July 2026 – August 2026

- Completed practical training in SQL and Power BI, focusing on data extraction, manipulation, analysis, cleaning, and visualization.
- Developed SQL queries using SQL Server to extract and analyze business data.
- Cleaned and transformed datasets using Power BI and developed interactive dashboards for business reporting.
- Worked with diverse datasets to identify patterns and communicate actionable business insights.
- Developed a US Candy Distributor Sales & Logistics Intelligence solution using SQL Server and Power BI.
- Applied data analysis and visualization techniques to support business-oriented decision-making.

PROJECTS

KUKU AFYA – AI-Based Poultry Health Android Application

September 2024 – March 2025

- Developed an Android mobile application using Java to assist poultry farmers in early disease detection.
- Implemented image-based disease prediction for conditions such as Newcastle disease and Coccidiosis using chicken droppings.
- Trained a machine learning model using Python on Google Colab.
- Integrated a chatbot providing chicken farming advice and health recommendations.
- Built a reminder system to notify farmers of critical farming activities.
- Implemented a community forum enabling farmers to share experiences and peer support.
- Focused on accessibility and AI-driven decision support for small-scale farmers.

ARC Hotel Booking System (Front-End)

January 2024 – August 2024

- Designed and developed a hotel room booking front-end system.
- Implemented responsive UI using HTML and CSS.
- Added interactive booking logic using JavaScript.
- Focused on user-friendly navigation and booking flow.

75 Years of Formula 1 Analysis- SQL & Power BI

July 2026-August 2026

- Analyzed decades of Formula 1 World Championship data covering drivers, constructors, circuits, races, results, podiums, and championship performance.
- Used SQL and Power BI to explore historical race data and identify performance trends.
- Developed an interactive dashboard for exploring F1 performance across different seasons and categories.

EDUCATION

Bachelor of Science in Computer Science

Egerton University, Nakuru

Secondary & Primary Education

- KCSE – Cardinal Otunga High School, Mosochi (Grade: B+)
- KCPE – Embakasi Garrison Primary School (Grade: B+)

TECHNICAL SKILLS

- **Programming:** Java, Python, JavaScript
- **Data & Business Intelligence:** SQL, SQL Server, Power BI, Data Cleaning, Data Transformation, Data Visualization, Dashboard Development
- **End-User Computing:** Hardware troubleshooting(Laptops, Desktops, printers), Windows OS
- **Web:** HTML, CSS, REST APIs
- **Tools:** Git, GitHub, Android Studio, VS Code, Postman, Sql, PowerBI
- **Other:** Cisco router and switch configuration, Fibre optics installation.

SOFT SKILLS

- Team leadership and supervision
- Collaboration and teamwork
- Strong interpersonal communication
- Community engagement and volunteerism

LANGUAGES

- English – Advanced
- Kiswahili – Advanced
